The Support You Need, The Look You Want!
About TRUFORM

A Common Sense, Focused Program

The TRUFORM® program is well suited for today’s support hosiery market due to our Attractive – Affordable – Effective approach:

• **Attractive** – TRUFORM offers consumers a choice of styles that look and feel like high-end department store hosiery;

• **Affordable** – Cost containment and self-pay market trends demand that support stockings be made more affordable. Common sense price points make TRUFORM a bona fide therapeutic alternative to traditional high-priced brands;

• **Effective** – Extensively wear and machine tested, these stockings provide the graduated compression therapy that patients require. That’s why physicians regularly write for TRUFORM.

A Common Sense, Focused Product Line

Many brands present a puzzling array of products that make correct selection and fitting difficult. The TRUFORM program features only the best selling ready-to-wear styles, organized into basic segments:

**Ladies’ Fashion Line** – fashionable yet medically effective (pp. 6-10)
- **LITES**, 8-15 and 15-20 mmHg sheer support, available in knee high, thigh high, panty and maternity styles.
- **OPAQUE**, 15-20 and 20-30 mmHg compression, available in knee high, thigh high and panty styles.
- **TruSheer®,** 20-30 and 30-40 mmHg compression, available in knee high, thigh high, panty and maternity styles.
- Women’s trouser and casual style socks provide 10-20 mmHg support in designer knit patterns.

**Therapeutic Socks For Men** – excellent support in classic, comfortable designs (pp. 11-12)
- Dress support socks in 8-15, 15-20, 20-30 and 30-40 mmHg compression.
- Casual and athletic socks with cushion foot in 15-20 mmHg compression.

**Medical Line** – traditional medical styling (pp. 13-16)
- 20-30 mmHg available in below Knee, thigh high, panty and maternity styles.
- 30-40 mmHg available in below knee and thigh high styles.
- Anti-Embolism Stockings available in below knee and thigh length styles.

**Signature Services**
- Physician Marketing Program
- Measuring & Certification Courses
- Full-color Patient Information Materials
- Easy On-line Ordering
- Customized Prescription Pad Program
- Colorful Point-Of-Purchase Signage
- Instructional Videos for Fitter Training and Consumer Education

**Specialty Socks** – gentle support and protection (p. 13)
- **TruSoft®** socks offer gentle support for sensitive feet; available in knee high, crew, and mini crew lengths.

**Accessories** (p. 17-18)
- TRUFORM offers several accessory items to make the therapeutic support hosiery experience comfortable and effective.
There is an appropriate TRUFORM elastic compression therapy product for each of your patients.

8-15 mmHg (mild)
- leg fatigue
- slight ankle, leg and foot swelling

15-20 mmHg (moderate)
- minor varicosities
- minor varicosities during pregnancy
- tired legs
- minor ankle, leg and foot swelling
- post surgery

18 mmHg (anti-embolism)
- prevention of thromboembolism
- reclining or bed confined home convalescence

20-30 mmHg (firm)
- tired, aching legs
- moderate varicosities
- moderate varicosities during pregnancy
- moderate edema
- post sclerotherapy and other surgery
- help prevent recurrence of venous ulcerations
- superficial thrombophlebitis

30-40 mmHg (extra firm)
- severe varicosities
- severe edema
- lymphatic edema
- helps prevent and manage venous ulcerations
- chronic venous insufficiency
- helps prevent post-thrombotic syndrome
- manage manifestations of PTS
- orthostatic hypotension
- post sclerotherapy
- post surgery

All compression ranges stated are the mean compression for an average ankle for a specific size. Please refer to the product insert, product label and package for comprehensive instructions on the proper selection and safe use of TRUFORM products.

Sizing for TRUFORM support hosiery is determined by combinations of circumference and length measurements, or by combinations of height and weight data. Some items, due to their design, may be “quick-fit” by shoe or sock size.

Sizing charts for TRUFORM hosiery are located on each product page throughout this catalog as appropriate.
Quality Products Hand-Crafted with Pride

Truform legwear is designed and engineered with patient compliance in mind. Truform delivers physician-prescribed elastic compression therapy, plus the style, selection, appearance and wearing comfort your customers want. But best of all, Truform is value-priced!

Take a closer look...

Knitting Operations

Truform employs the latest methods of semi-automated manufacturing, and utilizes the best in technology to produce a world-class product at affordable prices - our prescribing physicians trust them, our many clients appreciate their extraordinary value.

Each machine is programmed to precise manufacturing specifications, and our technicians monitor every step of the knitting process. The combination of technology and knitting “know-how” ensures that Truform stockings are among the highest quality, pressure gradient garments produced anywhere in the world.

Sewing Operations

We combine the finest materials and the most up-to-date methods of lean manufacturing, along with “old-world” hand craftsmanship to produce Truform garments.

Operations include:
- Close toe opening
- Finishing proximal band
- Attaching standard and silicone proximal bands
- Completing panty component, adding waistband
Finishing Operations

Finishing operations include...
- Wet Process - scour, color, and condition
- Board - set finished (relaxed) length, and smooth
- Pack-out - inspect, pair, and poly-pack

Quality Assurance

Quality assurance checks are performed throughout our entire manufacturing process to verify fabric integrity, fit and a therapeutic, pressure-gradient profile.

Compression Profile

To be therapeutically effective, medical stockings must provide a pressure reduction from the ankle upwards.

TRUFORM takes compression measurements at precise intervals between the ankle and proximal end of the stocking - 3 points for below knee, 6 points for thigh length and panty hose styles - to insure an accurate distribution of the pressure gradient.

Multiple measurements guarantee that TRUFORM garments are comfortable and will deliver the prescribed graduated elastic compression therapy, without undesirable pressure inversions, when properly sized and fit to the patient.

State-of-the-art materials and equipment, plus knitting “know-how” are the keys to the TRUFORM ADVANTAGE!
TRUFORM LITES stockings and pantyhose provide an ideal combination of fashion, support and durability to help promote circulation and improve leg health. They provide mild to moderate graduated compression to help energize the legs and reduce leg discomfort.

**LITES Sheer Support for Women**

TRUFORM LITES stockings and pantyhose provide an ideal combination of fashion, support and durability to help promote circulation and improve leg health. They provide mild to moderate graduated compression to help energize the legs and reduce leg discomfort.

**Knee Highs**

Women’s Trouser Socks

TRUFORM trouser socks are designed to help energize the legs and reduce leg discomfort. Microfiber nylon on the rib, cable and diamond patterns is soft and cooler to wear than standard nylon. Attractive designer-knit delicate patterns make these socks an excellent choice for business or business-casual wear.

**Rib Pattern**

Style no. 1973 (10-20 mmHg) offers moderate support, features a soft, comfortable microfiber nylon construction. A reinforced heel and toe provide added comfort, and a soft top band helps keep socks in place. Colors:
- Black - 1973BL
- Brown - 1973BN
- Navy - 1973NV
- Tan - 1973TN
- White - 1973WH

**Cable Pattern**

Style no. 1975 (10-20 mmHg) offers moderate support with the same construction and features in a cable pattern. Colors:
- Black - 1975BL
- Brown - 1975BN
- Navy - 1975NV
- Tan - 1975TN
- White - 1975WH

**Diamond Pattern**

Style no. 1976 (10-20 mmHg) offers moderate support with the same construction and features in a diamond pattern. Colors:
- Black - 1976BL
- Brown - 1976BN
- Navy - 1976NV
- Tan - 1976TN
- White - 1976WH

**TruSoft Socks**

Style no. **1913 (8-15 mmHg)** combines moisture-wicking yarns, antibacterial, “stay fresh” finish, gentle support, and a low-profile toe seam to help keep feet comfortable and dry; prevent odor; reduce friction for extra protection and comfort; and reduce pressure and irritation on the toes. Colors:
- Black - 1913BL
- White - 1913WH

Style no. **1912 (8-15 mmHg)** offers the same support with the same construction and features in a crew length. Colors:
- Black - 1912BL
- White - 1912WH

Style no. **1911** offers the same construction and features in a mini-crew length (no compression due to mini-crew length). Colors:
- White - 1911WH

**Comfort Care Socks**

Style no. **1914** casual socks are designed for anyone with special needs in foot care. They are crew length, cut extra deep and extra wide with a seamless toe closure. They are non-binding and comfortable, and can even be worn over a cast. These socks are suitable for wear at night for warmth, and provide excellent cover for use with medicinal or softening creams. Colors:
- Black - 1914BL
- White - 1914WH

Style no. **1915** offers the same features with a dress-style construction and feel. Colors:
- Black - 1915BL
- White - 1915WH

(2X-LARGE and 3X-LARGE available in Knee-high only.)

Style nos. 0868 and 8868 (20-30 mmHg) offer firm support and feature a silicone dot band and knit-in heel and toe. Nos. 0866 and 8866 feature a soft band. No. 8867 features a silicone lace band. Colors:

- Beige - 0866BG (open toe, soft band)
  0868BG (open toe, dot band)
  8866BG (closed toe, soft band)
  8867BG (closed toe, lace band)
- Black - 0868BL (open toe, dot band)
  8868BL (closed toe, dot band)

Style nos. 0848 and 8848 (30-40 mmHg) offer stronger extra-firm support and feature a silicone dot band and knit-in heel and toe. Nos. 0846 and 8846 feature a soft band. Colors:

- Beige - 0846BG (open toe, soft band)
  0848BG (open toe, dot band)
  8846BG (closed toe, soft band)
  8848BG (closed toe, dot band)
- Black - 8848BL (closed toe, dot band)
Truform medical style pantyhose provide the right combination of attractive appearance, wearing comfort and effective therapeutic compression for moderate to pronounced conditions. Neutral colors and smooth knit fabric conceal unsightly skin conditions due to poor circulation.

Medical Pantyhose

Pantyhose

Style no. 1756 (20-30 mmHg) offers firm support and features reinforced flat seams for comfort, a generous, ventilated cotton panel, soft plush waistband, and knit-in heel and toe pockets for a precise fit. Colors:
- Beige - 1756BG
- Black - 1756BL

Maternity

Maternity style no. 1757 (20-30 mmHg) offers the same firm support and features along with an expandable panel for use throughout the 2nd and 3rd trimesters. Use pre-pregnancy weight to determine the correct size. Colors:
- Beige - 1757BG
- Black - 1757BL

Full Figure

Style no. 1758 (20-30 mmHg) offers the same firm support and features for the special needs of the petite, full-figured woman – under 5’5” and weighing over 150 lbs. Unparalleled sizing in a form fitting, ready-to-wear stocking at a standard stock price. Colors:
- Beige - 1758BG
- Black - 1758BL

www.truform.com
**Anti-Embolism Stockings**

TRUFORM anti-embolism stockings are recommended primarily for the recuperating patient. They are designed to help reduce the danger of thromboembolic disease for the reclining or bed-confined patient. They are also ideal for use with the post-surgical home convalescing patient. The open toe feature allows for easy toe inspection by the caregiver.

**Knee Highs**

Style nos. 0808 and 8808 (18 mmHg) provide a thromboembolic deterrent and feature a soft band, as well as knit-in heel and toe to provide comfort, style, and good fit. Available in either open toe – that allows for easy toe inspection by the caregiver – or closed toe. Colors:

- Beige - 0808BG (open toe)
  - 0808SBG (open toe, short)
  - 8808BG (closed toe)
  - 8808SBG (closed toe, short)
- Black - 8808BL (closed toe)
- White - 0808WH (open toe)
  - 8808WH (closed toe)

**Thigh Length**

Style nos. 0810 and 8810 (18 mmHg) provide the same thromboembolic deterrent and feature a generous expansion panel at the upper thigh to help maintain circulation through that area. A silicone dot band keeps the stocking in position throughout the day. Colors:

- Beige - 0810BG (open toe)
  - 8810BG (closed toe)
- Black - 8810BL (closed toe)
- White - 0810WH (open toe)
  - 8810WH (closed toe)

**Garter Belts, Slip Socks**

2” Waist Band

Style no. 0762 provides an attractive way to keep above-the-knee style stockings in their correct position. Garter attachments are adjustable in length for a comfortable fit. Ideal for thigh high and full thigh high style stockings that do not extend beyond the groin.

3” & 6” Waist Band

The nos. 0760 (3” waist band) and 0765 (6” waist band) standard style garter belts are practical and easy to wear. The adjustable garters offer a convenient way to keep stockings in place – suitable for both men and women. The 6” waist band featured on no. 0765 is recommended for the pendulous figure.

Slip Sock

Often the most difficult part of applying medical compression stockings is getting them over the heel and ankle. The TRUFORM Slip Sock (style no. 0750) is designed to help open toe stockings slide smoothly onto the foot and over the ankle by reducing friction between the patient’s skin and the compression stocking.

Slide Slip Sock onto the foot, turn stocking inside out to the heel. Slide stocking over the Slip Sock until heel is centered in the heel pocket of the stocking. Begin turning right side out gradually up the leg to apply stocking. Slip Sock may be removed by pulling gently through the toe opening of the stocking.

Donning Gloves, Stocking Donner

Style no 0757 latex free donning gloves facilitate the safe application of valuable compression garments.

The non-slip, easy grip surface on the palm and fingers help ease compression hose on and protect the fabric from being punctured by rings or fingernails.

These special gloves are higher quality and more comfortable than standard rubber donning gloves.

Latex Free TRUFORM Donning Gloves make donning compression stockings much easier. They also protect the stockings from runs and snags while putting them on.

TRUFORM Donning Gloves are made from 55% nitrile, 44% polyester, 1% spandex – latex free.

</table>

The TRUFORM Stocking Donner style no. 0752 is an application aid assist device designed to help individuals correctly and easily apply their compression garments. Easier application helps improve compliance and makes their therapeutic support hosiery experience comfortable and effective.

This simple step-in device allows for easy, correct application of graduated compression stockings, even if the individual has lost some hand strength and dexterity.

The donner works for the wearer by stretching the fabric so that it is much easier to slip up and over the foot and heel.

The device features a lightweight, sturdy wire frame construction with a protective coating that will not harm even the most delicate support hosiery. Available in Regular and Large sizes to accommodate most legs.

Latex free raised bumps for improved grip.
Free Standing Spinner Unit No. 8723

- Attractive
- Educational
- Free-standing
- Space saving
- Easily portable
- Highly flexible

Truform’s no. 8723 free standing spinner unit is an attractive space-saving and highly flexible merchandising tool to help drive your compression hosiery sales.

Containing only the best mix of styles and colors, it can be easily repositioned to match normal and seasonal traffic patterns in your store.

No. 8723 Four Sided Spinner Unit includes:
